

The Choice of Forward-Thinking TLDs

At CIRA, we've taken everything we know about operating a world-class ccTLD and put it into our Registry Platform, a next-generation management system built for the modern TLD. With flexible deployment options, patented tools and boutique service, forward-thinking ccTLDs and gTLDs worldwide have made CIRA Registry Services their partner of choice.

Patented management tools

- Create powerful, variable pricing models
- Easily manage users and administration
- Customize notifications and messaging

Reliable and secure

- ISO 27001: 2013 certified
- Trusted .CA platform designed for 100% uptime
- Global infrastructure and DNS footprint

Ultimate flexibility

- Multiple deployment models and DB options
- Rapid custom feature integration process
- Editable business rules; no code changes

Full suite of services

- EBERO provider for ICANN and ccTLDs
- Global Anycast provider to 200+ major TLDs
- Seamless registry migrations

“

.IE is delighted to have completed the transition to a new Registry Platform with the smooth migration of our .ie database. The TITAN registry management system has been designed by the Canadian Internet Registry Authority, which customised its Fury Registry Platform to operate and implement the .ie managed registry policies effective in Ireland and to comply with EU data protection regulations (GDPR).”

DAVID CURTIN,
CEO
.IE

Gain the Benefits of TLDs Worldwide

When you join CIRA Registry Services, you join a community of ccTLDs and gTLDs that trust their critical infrastructure to one of the world's largest and most reliable registry operators. What's more, you gain the features required by other TLDs worldwide.

Partnering with CIRA means partnering with the provider of choice for:

ccTLDs

gTLDs

.brands

new gTLD applicants

EBERO services

We evaluated a number of different registry platform solutions, and we chose the CIRA Registry Platform because it will provide .nz with world-class stability, flexibility and useability. We are also very pleased to be working in partnership with another registry operator in CIRA that shares our public good goals and community ethos.”

JORDAN CARTER,
CHIEF EXECUTIVE
INTERNETNZ GROUP

Bright ideas for the future

As a not-for-profit, our goals include creating programs, products and services to help build a trusted internet and a 100% reliable infrastructure.

Every day we reinvest back into the CIRA Registry Platform to keep it state of the art and to develop unparalleled new features for tomorrow.

You need the best partner to boost your platform and build your TLD business.
