Break down silos, gain unprecedented visibility and **respond to threats faster**

Digital threats are increasing in size and sophistication every day, showing no signs of letting up. Malicious actors aim to deploy payloads, exfiltrate data and embed themselves in your systems. **Stop them in their tracks.**

Security teams working with siloed data and manual threat correlation face time-consuming and error-prone processes, often identifying threats too late—or not at all. To effectively combat these sophisticated threats, you need a comprehensive solution that integrates advanced threat detection and response capabilities tailored to your organization's tech stack. CIRA XDR provides the robust protection you need to stay ahead of these complex challenges.

Detect threats earlier, automate faster responses and ensure better security outcomes. CIRA XDR is a comprehensive security solution that integrates detection, investigation and response capabilities across multiple security domains, including endpoints, identities, cloud applications, email, data stores and more. Together, we can strengthen our defences and stay ahead of emerging threats.

Bring your security data together to *ACHIEVE BETTER OUTCOMES*

Unified endpoint security with lightweight agents

Gain greater visibility into your security environment and detect and stop attacks, all with minimal system impact.

Stop attacks with our community resources

Join a coalition of like-minded organizations and contribute to a shared repository of threats, automations, insights and more.

Scalable and adaptable protection

Get advanced threat detection and response that adapts to your systems and effortlessly scales to your organization.

Equitable pricing with no vendor lock

Enjoy transparent pricing and the freedom to integrate with any tool you choose—not just ours.

Track and ensure compliance

Receive continuous monitoring on your compliance status with frameworks such as PCI DSS, NIST 800-53, TSC and GDPR, providing real-time alerts and detailed audit trails.

Reduce alert fatigue and free up time

Empower your IT and security teams to focus on high-value tasks and strategic initiatives rather than getting bogged down by constant monitoring and false alarms.

CIRA.CA/XDR

eXtended → Detection → Response

eXtended

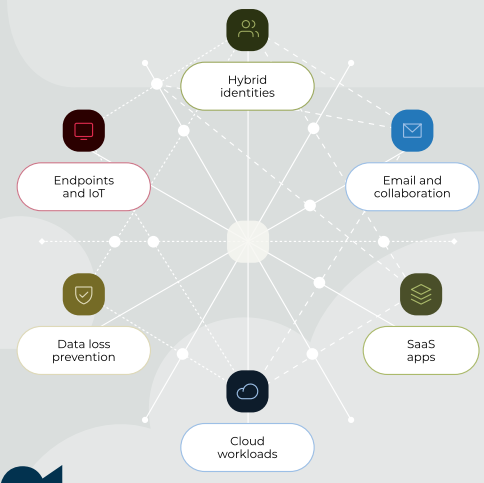
A unified platform that strengthens your security by connecting data across your network, endpoints and cloud.

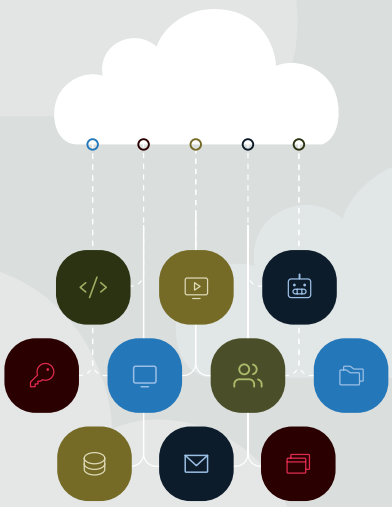
Detection

Smarter identification with threat intelligence and advanced analytics.

Response

Rapid, automated action to stop attacks before they spread, keeping your organization secure.





THE POWER OF CIRA XDR

Customized dashboard for decision-making

Make quick and informed decisions with a tailored dashboard view of relevant organizational data and metrics.

Respond rapidly

Leverage actionable intelligence to detect threats and respond to security incidents and alerts however you choose.

Designed for Canadian organizations

Keep your data in Canada and lean on our friendly Canadian team for support and expertise.

Benefit from hosted infrastructure

Save time with simplified deployment, streamlined analysis and automated responses. Organizations can also choose On-Premises XDR.

- Log data analysis
- Container security
- Regulatory compliance
- Vulnerability detection
- Security configuration assessment
- Posture management
- Malware detection
- Incident response
- Threat hunting
- Cloud protection
- File integrity monitoring
- IT hygiene

Easily create automations and workflows

Create powerful workflows and apps in hours, drastically reducing time-to-value for automation initiatives.

Detect attacks missed with siloed data

Eliminate blind spots, correlate weak signals from multiple sources and detect attacks that signature-based solutions can miss.

CANADA'S CYBERSECURITY **service provider**

As the organization behind .CA and a leader in cybersecurity solutions, CIRA has combined its Canadian insights and global expertise to create CIRA XDR—an open-source solution built to deliver professional-grade threat detection and response. We deliver enterprise-level protection without enterprise-level headaches—driven by our mission to protect Canadians, not maximize shareholder value.
